

AUTO METER Tachometers

Auto Meter offers the solution for any level of performance monitoring you need, whether you need only to monitor the critical systems like oil, water, and volt, or your needs have been expanded due to the addition of nitrous or boost. Autometer's broad line includes styling and quality levels for everything from sport compact street, restoration and street rod, and all-out performance.

COBALT™

By day the Cobalt gauges feature a black dial face, anodized bezel, white numbering and blue accents. By night, an explosion of cobalt blue light shines through the dial. The gauge pointer glows red for extreme visibility and contrast. Using LED technology, the lighting produces no heat.

ULTRA-LITE™

Ultra-Lite II Tachs have been infused with superior lighting technology, providing "at-a-glance" readings day or night. All models feature silver dials by day with bold black markings. At night, Ultra-Lite II instruments utilize a reverse lighting effect to create a dark dial that radiates intense, bright white light through numbers and major increments with minor increments appearing in contrasting amber.

Phantom™

Classic Phantom design with modern features and styling. Phantom II Tachs Combine traditional high performance Auto Meter quality and functions with bold outlined white on white dials, reverse white LED through the dial lighting, and glowing red pointers.

SPORT-COMP™

Sport Comp II Tachs combine the dependable, rugged mechanicals of the Sport Comp gauge line with through the dial gauge LED illumination and glowing red pointers for improved visibility.

Seven Color LED Illumination

- Choose from Blue, White, Red, Orange, Green, Yellow, or Purple

Full Dial Alert

- Warns driver of critical conditions

Peak Reading Recall & Run Recording Memory

- Continuous peak data readings for each gauge on the N1.0 Network System
- Record up to 35 sec. of data with NEXUS internal recording memory

SD Card Capability

- Record up to 11 minutes of data per megabyte

N1.0 Network System

- Proprietary digital communications network between gauges

Remote Control Operation

- Program warning points; select color, dimming, demo, peak, record, & playback

Save Gas, Money, and the Environment with the all new ecometer!

NEW!

ECOMETER

Designed to help consumers save gas, money, and reduce their CO (carbon monoxide) emissions. The ecometer is a fuel consumption eco-gauge that helps drivers visually monitor how their driving style impacts their vehicles fuel economy performance. The ecometer installs in seconds with no tools or drilling required and can mount anywhere. Displays real-time fuel consumption (MPG) on both an easy to read digital display, and through an always-on innovative color coded eco-graph.

Part No. 9100

D-PIC™

Horsepower Mode

- Calculate peak horsepower at the wheels (whp)
- Compare the last recording to your best

60 to 0 MPH Braking Distance

- Precisely calculate the distance your vehicle needs to stop from 60 MPH
- Capture Peak Deceleration Gs and begin to understand braking and traction thresholds
- Review and compare the last stop to your best and note how brake fade and modifications affect stopping distance

Real -Time Gs

- Choose to view forward (front - back) or lateral (left - right) axis instantaneous acceleration G Forces (Gs) on the LED array & digital display
- LED array shows magnitude of G force.
- Peak memory recalls highest Gs achieved in both axes (all four directions)

1/4 Mile ET and Speed

- Record and view data for quarter mile acceleration reaction time
- Practice & record reaction time in 1/4 mile acceleration mode

Clean Installation

- 2 1/16" (52mm) gauge size - D-PIC's compact size allows easy mounting in Pod, Pillar, Cup, Panel, and custom dash locations

0 to 60 MPH Acceleration Time

- Measure 0-60 mph acceleration times with precision

DESCRIPTION	PART NO.
Cobalt 2-1/16" (-2G - +2G)	6180
Ultra-Lite 2-1/16" (-2G - +2G)	4380
Phantom 2-1/16" (-2G - +2G)	5780

WIDE BAND AIR/FUEL RATIO KIT

Premium gauge kits that provide more consistent and accurate Air/Fuel ratio readings. Models produced to assure that you have a display that matches the rest of our instrument package. Includes a Bosch wideband O2 sensor and is user programmable for range and sensitivity.

DESCRIPTION	PART NO.
Cobalt	6178

Ultra-Lite	4378

Auto Meter's Autogage line offers economical instruments for street performance vehicles and entry level race applications. These gauges and tachometers bring Auto Meter's heritage of building race winning gauges to the consumer needing good design at an affordable cost. These economical gauges offer a race inspired design with the trademark Auto Meter look.

5" MONSTER SHIFT-LITE TACHOMETERS

These economical tachs offer a race inspired design with the trademark Auto Meter look. The large 5" dial face offers maximum readability and is accented by the fluorescent red pointer.

DESCRIPTION	PART NO.
10,000 RPM w/Shift-Lite on shield	233903
10,000 RPM w/external Shift-Lite	233904
8,000 RPM w/external Shift-Lite	233905
10,000 RPM w/external Shift-Lite	233911

5" MONSTER MEMORY TACHOMETERS

The peak RPM Memory feature allows you to recall the highest engine RPM achieved. This helps point out engine over-revving and also aids in setting optimum gear ratios.

DESCRIPTION	PART NO.
10,000 RPM Memory Tach	233902
10,000 RPM Shift-Lite Memory Tach	233906

TACHOMETERS

These tachs have 3 3/4" dial face, adjustable red-line, 12V lighting and turn and swivel mounting. Hardware included for installation.

DESCRIPTION	PART NO.
8,000 RPM - Chrome finish	2301
8,000 RPM - Black finish	2300

Auto Meter offers the solution for any level of performance monitoring you need, whether you need only to monitor the critical systems like oil, water, and volt, or your needs have been expanded due to the addition of nitrous or boost. Auto Meter's broad line includes styling and quality levels for everything from sport compact street, restoration and street rod, and all-out performance. Auto Meter is the most trusted name in performance gauges.

DIGITAL PRO SHIFT SYSTEM

See the accuracy of this shift light as it digitally displays the engine RPM and brilliantly flashes LED indicators when the preset RPM trigger point is reached. Available in three configurations: Level 1 features a single programmable shift indication, Level 2 adds 5 shift point settings and multicolor shift colors, and Level 3 adds a RPM playback feature that will playback on the digital display as well as output to an Auto Meter tach.

DESCRIPTION	LEVEL 1	LEVEL 2	LEVEL 3
DPSS Module	5312	5313	5314
DPSS Tube (Black)	5343	5348	5350
DPSS Tube (Silver)	5344	5349	5351

DIGITAL PRO SHIFT SYSTEM GAUGES

LEVEL 1 - Features single programmable digital shift point, digital RPM display, compatible with .5-6 pulse ignition signals (4-12 cyl engines), and single color shift light.

LEVEL 2 - Four-Stage Shift-Lite. Seven color LED lighting. Operates on most 4, 6, 8, 10, & 12 cylinder engines with points, electronic, DIS and most 12V high performance racing ignitions.

LEVEL 3 - 5 programmable shift points including Launch Lite, progressive shift, playback, digital RPM display, compatible w/ .5-6 pulse ignition signals (4-12 cyl engines), and seven color shift light.

TACH ADAPTER

Allows users to connect a tachometer, shift light or RPM activated switch to their distributorless ignition system (including '99 and newer Mustangs). This unit senses the current going through the positive coil source wire, then converts that information into a 12-volt square wave signal that can be read by Auto Meter tachs and accessories. Compact and completely potted with polyurethane for vibration and water protection. Wires easily inline on the coil positive 12-volt wire, ground wire and the tach output wire.

Part No. 9117

12 LED SUPER-LITE SHIFT LITE

Direct replacement for existing Auto Meter Shift-Lites. Can be used with 5310. Ultra-Fast response, vibration resistant Amber 12 LED light. Three levels of brightness adjustment for the perfect light level any time of day!

DESCRIPTION	PART NO.
12 LED Super-Lite Shift-Lite - Black	5332
12 LED Super-Lite Shift-Lite - Silver	5333

PRO-LITE

Used when there is no time to monitor gauges, sender unit sold separately. Includes red lens and night cover.

DESCRIPTION	PART NO.
Pro-Lite	3240
Sender - 15 PSI	3241
Sender - 30 PSI	3242
Sender - 210°-230°F	3247
Blue Lens Kit, Includes Lens & Night Cover	3250
Yellow Lens Kit, Includes Lens & Night Cover	3251
Red Lens Kit, Includes Lens & Night Cover	3252

QUICK-LITE SHIFT-LITE

This LED Shift-Lite is a replacement option for Auto Meter tachometers with the larger size light. Can also be used as a shift light when combined with the Auto Meter Pro-Control or any other rpm trigger.

DESCRIPTION	PART NO.
Quick-Lite Shift-Lite - Black	5330
Quick-Lite Shift-Lite - Silver	5331

MINI PRO-LITE WARNING LIGHTS

This lightweight aluminum warning light operates the same as the larger Pro-Lite by giving you unmistakable warning during the heat of racing action. A bright red incandescent bulb attracts immediate attention (night cover included). 12-volt power and switch required.

DESCRIPTION	PART NO.
Mini Pro-Lite warning Light - Silver	3238
Mini Pro-Lite warning Light - Black	3239

PILLAR MOUNTS for EDGE ATTITUDE IN-CAB CONTROLLER

An innovative way to mount the EDGE Attitude diesel monitor/controller. The new Edge Attitude Pillar Mount conveniently positions the Attitude within the driver's reach and peripheral line of sight. Each mount is a direct replacement for the factory driver's-side A-pillar. Made from .125"-thick ABS plastic that has molded-in dash-matching grain, the mount won't blister or deform (even when exposed to sunlight). It can be easily painted to match the vehicle's interior. The Pillar Mount features a recess for the Attitude monitor/controller.
