**Don't forget your Recharger® Filter Care Kit.**

Some parts are not legal for sale or use in California on any pollution controlled motor vehicle.

## High-Flow Intake Systems

### THE ULTIMATE WEAPON IN THE HORSEPOWER WARS!

Our air intakes are proven to increase horsepower and torque. These thoroughly engineered air intakes provide huge increases in power that you will definitely feel when you accelerate.

K&N High-Flow Intake Systems are guaranteed to increase horsepower and improve throttle response by replacing your vehicle's restrictive factory airbox and filter element. K&N's state-of-the-art intake systems replace your airbox and filter with a new open element, 360° oversize conical high-flow filter that is backed by K&N's Famous Million Mile Limited Warranty. The filter is isolated from high engine temperatures by a powder coated heat shield designed to help stop hot, under hood air, from being sucked into your engine. Then to improve the air path between the filter and your engine a smooth-flowing heat-resistant intake tube is used that increases airflow to your engine. All K&N Intake Systems come complete with detailed instructions & hardware and usually install in 90 minutes or less.

### REAL HORSEPOWER! HORSEPOWER YOU CAN TRUST, SINCE 1969

- Over 500 Systems Available
- Guaranteed Horsepower
- Improved Throttle Response
- Won't Void Factory Warranty
- Million Mile Limited Warranty®

# Cold Air Intake Systems - Truck/SUV

AIRAID® Intake Systems are computer designed to give your engine maximum air flow, which means more horsepower, torque and improved fuel efficiency. Every AIRAID® intake system is dyno tested and tuned to provide maximum performance and efficiency. By utilizing computer-aid design, AIRAID® Intake Systems offer unmatched fit and finish, and a lifetime warranty. And each AIRAID® intake provides superior air filtration, since it comes with an AIRAID® Premium Filter featuring our exclusive SynthaFlow® Technology.

- **Exclusive SynthaFlow® Technology**
- **Maximum Airflow & Filtration**
- **Increased FUEL EFFICIENCY**
- **Bolt On Torque & HP**

## Cold Air Intake Systems - Truck/SUV

AIRAIID® Classic Intakes add a new spin to vehicles with limited air flow to the original filter location. The intake tube and premium filter optimize air flow and fuel efficiency.

AIRAIID® QuickFit™ Intakes are specifically designed to get more out of an engine using the vehicle's stock cold-air inlet and filter housing for an aggressive improvement over stock.

AIRAIID® Cool Air Dam Intakes use the stock air filter location, but provide a boost with a huge air inlet to keep more cold air flowing through the 360-degree AIRAIID® Premium Filter.

# Intake Systems - Cars

AIRAID® Intake Systems are available for the most popular Car models including: Chevrolet Corvette, Dodge Challenger, and Ford Mustang. Each intake system is dyno tested and tuned to maximize air flow and improve horsepower, torque and fuel efficiency - an important consideration as fuel costs soar. AIRAID® Intake Systems offer unmatched fit and finish, easy bolt-on installation and feature a lifetime "No-Hassle" warranty

## Increased HORSEPOWER, TORQUE & FUEL EFFICIENCY!

- Bolt On Torque & Horsepower
- Increased FUEL EFFICIENCY
- Maximum Airflow & Filtration
- Exclusive SynthsFlow® Technology

## Modular Intake Tubes

Move air right where you need it most - your high-performance engine! AIRAID® Modular Intake Tubes are comprised of cross-linked, high-density polyethylene with a smooth inner surface to "straighten" air flow and improve vehicle intake up to 400 CFM over restrictive stock intake tubes. Each tube comes with all of the necessary clamps and bolts.

Advanced Engine Management is a company based on one simple philosophy...If it doesn't create horsepower, we won't make it. AEM makes horsepower! When you buy AEM performance parts, you are getting the finest engineering, highest quality and best value the industry has to offer.

### BRUTE FORCE INTAKES

AEM BRUTE FORCE intakes deliver the most Air Power for your truck, SUV or fuel-injected musclecar.

AEM designs its BRUTE FORCE intakes for popular trucks, SUVs and late-model, fuel injected musclecars, and dyno-tunes each system to produce more torque and horsepower for large displacement engines. We test against the competition with the goal to outperform all other offerings.

## BRUTE FORCE HD DIESEL INTAKES

AEM's Brute Force HD intakes for diesel applications feature a massive DRYFLOW filter element! We engineer our Brute Force HD intakes to deliver maximum flow, filtration and durability for heavy duty applications and they even outperform the company's BRUTE FORCE intakes for these vehicles in both dust holding capacity and filter flow. AEM's reusable DRYFLOW air filter for its Diesel applications is engineered to allow for longer service life and higher efficiency for maximum performance in between servicing (more DRYFLOW key features are below). The Brute Force HD Dryflow filter features over twice the surface area of filter media and utilizes deep, bull-nosed pleats to improve dust holding capacity and increase intervals between cleanings.

- **DRYFLOW Synthetic air filter is up to 99.52% efficient in FINE DUST testing, filters dirt as small as one micron, and never needs filter oil!**
- **Less down time between cleanings and no more chance of over-oiling. It takes the guesswork out of servicing your air filter**
- **An injection molded ABS plastic filter lid and base provide increased structural rigidity - it's virtually impossible to collapse!**
- **No mesh screen means no more filter damage from shipping, bumps during installation or cleaning**
- **Element is cleanable and is Guaranteed for Life!**
- **Will not void your vehicle warranty!**

## High-Flow Air Filters

For over 35 years, the Original K&N High-Flow Air Filter continues to set the standard by which all other air filters are measured. Our air filters contain 4 to 6 layers of cotton gauze, which in tandem with our oil is sufficient to provide outstanding filtration and low restriction.

## K&N HIGH-FLOW AIR FILTERS

- Increases Horsepower
- Never Needs Replacement
- Washable/Reusable
- Available for Most Cars & Trucks

Applications Available for Nearly Every Car, Truck, Motorcycle or ATV On and Off The Road!

# High-Flow Air Filters

For over 35 years, the Original K&N High-Flow Air Filter continues to set the standard by which all other air filters are measured. Our air filters contain 4 to 6 layers of cotton gauze, which in tandem with our oil is sufficient to provide outstanding filtration and low restriction.

## K&N HIGH-FLOW AIR FILTERS

- Increases Horsepower
- Never Needs Replacement
- Washable/Reusable
- Available for Most Cars & Trucks

Applications Available for Nearly Every Car, Truck, Motorcycle or ATV On and Off The Road!

# POWERAID® Throttle Body Spacers

Developed to enhance off-idle to mid-range performance and efficiency, Airaid's PowerAid® Throttle Body Spacers, built from Aircraft Grade Billet 6061-T6 Aluminum, feature a unique Helix Bore Design that creates a dynamic spinning action of the incoming air. As air passes through the throttle body, the helical effect causes air molecules to organize and maintain high velocity, providing a superior atomized mix of fuel and air all the way into an engine's combustion chamber. The result is torque gains between 800 to 2,500 RPM, as well as potential increases in fuel economy (depending on driving conditions).

- **Improved Fuel Efficiency, Better Fuel Economy**
- **Improves Low-end Torque and Throttle Response**
- **Optimizes Power at the Lower RPM Range, Where You Drive Most!**
- **Easy Bolt-on Installation**
