

PAINLESS Truck Wiring & Power Modules

It's a lot more than circuits and wire! At Painless, all of our harnesses are designed by real engineers using the latest in diagnostic equipment and AutoCAD to ensure consistency in manufacturing and an accurate and easy installation. You'll appreciate that we properly group each wire in sections so that instead of routing eighty or a hundred individual wires, you route entire sections of the vehicle at one time, drastically reducing installation time and virtually eliminating routing errors. That's why we say: With Painless, half the work is done for you.

CUMMINS DIESEL HARNESS

The first aftermarket harness to facilitate the transplant of a Cummins diesel engine. Includes factory connectors for all sensors and switches. The 10-circuit fuse block includes three relays for fuel pump, fuel heater and ignition. All connectors and the fuse block are fully sealed and waterproofed.

APPLICATION

2003-2007 5.9L Cummins* (engine only)
2003-2007 5.9L Cummins* (includes wiring for auto trans.)

COMPLETE CHASSIS HARNESS ASSEMBLY

The quick, easy and Painless way to rewire just about any vehicle, whether a Ford or Chevy. If you're running just the basics like headlights, taillights, turn signals, etc., use the 12 circuit kit. Thinking of adding power windows, door locks or other creature comforts? Use the 18 circuit kit. All Painless chassis harnesses come with a durable, OE-style fuse block with wiring already terminated so half the job is already done. Simply mount the fuse block, route the pre-printed, color-coded wire and go. The easiest to install wiring system on the market today.

Striker ColdShot II with 7 quart reservoir 65005

STRIKER I DIESEL POWER MODULE

Striker I - Painless introduces the most compact diesel performance module on the market. These are inline modules, not downloaders, therefore they leave no trace on your vehicle's ECU.

- Up to 10 power levels
- 100-plus HP gain
- Shift on-the-fly
- Displays high pressure fuel gauge, oil pressure gauge and boost gauge
- Built-in anti-theft mode
- Easy 15 minute installation

STRIKER II DIESEL POWER MODULE

Striker II - A more basic unit with the most popular module features:

- 5 power levels
- LED Power level display
- Up to 65 HP gain
- Adjustable on-the-fly
- Fuel Economy mode
- Easy installation

EDGE RACING

The Edge Racing brand is dedicated to bringing to market new, race-only products designed to suit the needs of thousands of diesel motorsports enthusiasts that participate in sled pulls, drag racing, dyno competitions and other off-road events. Edge Racing branded products will be dedicated to helping enthusiasts win on the tracks and trails.

Chevy/GMC Race Evolution

Chevy/GMC Duramax LLY/LBZ/LMM '06-'09

KEY FEATURES:

- 7 race power levels
- **UP TO AN ADDITIONAL 180+ HP AND 385+ FT-LBS OF TORQUE**
- Reads and displays EGTs, Probe included
- Internet updateable (USB cable included)
- Displays and clears diagnostic trouble codes with full text description
- Adjustable LED backlight color
- Displays alerts and records such as RPM, MPH, and EGT
- 0-60 and quarter-mile performance tests with drag strip Christmas tree lighting and reaction times
- Simple Installation

ADVANCED TUNING:

- Corrects for non-stock tire sizes to display true speed
- Adjusts speed and rev limiters

Bonus Features For The 2007-2009 LMM:

- Display DPF regeneration status
- Display Soot Mass in Diesel Particulate Filter
- Display Injector Balance Rates
- On-demand Regeneration to clean Diesel Particulate Filter
- 7 Race tunes designed for modified, free-flowing exhaust systems in race applications

Bonus Features For The 2006-2007 LLY/LBZ:

- 7 Race tunes designed for modified exhaust recirculation systems*

*Note: These products will not work on GM 4500/5500 or larger series trucks; it will only work on the 2500HD and the 3500 models.

Part No. 25500 2006-2009 Chevy/GMC Duramax LLY/LBZ/LMM

NEW for 2009!

FORD POWERSTROKE 6.4L 2008-2009

KEY FEATURES:

- 4 race power levels
- **UP TO AN ADDITIONAL 140+ HP AND 260+ FT-LBS OF TORQUE**
- 4 Race tunes designed for modified, free-flowing exhaust systems in race applications
- Reads and displays EGTs via OBDII port (no drilling required)
- Internet updateable (USB cable included)
- Display DPF regeneration status
- Displays and clears diagnostic trouble codes with full text description
- Adjustable LED backlight color
- Displays alerts and records such as RPM, MPH, and EGT
- Simple Installation

ADVANCED TUNING:

- Corrects for non-stock tire sizes to display true speed on monitor
- Adjusts speed and rev limiters

Part No. 15500 2008-2009 Ford Powerstroke 6.4L

Horsepower and foot pounds of torque can vary due to various types of vehicle modifications. Extreme power levels (4-7) are designed for extreme race applications and require vehicle modifications. These modifications can range from upgraded turbo/s, dual CP3 injection pumps, lift pump, fuel rail shim or plug, torque converters, transmission upgrades and more. With the addition of these and other modifications the Race Evolution can provide higher horsepower and torque gains while preserving the integrity of the truck. Users of these extreme power levels should consult a professional to ensure proper upgrades are in place to both maximize performance and protect the vehicle from unnecessary damage. At a minimum transmission upgrades should be performed on the truck when running extreme power levels.

WARNING! This product will not be operable unless and until registered at www.edgeproductsracing.com, and such registration will require purchaser/user's agreement to certain terms and conditions, such as acknowledgement that the product may NOT be legally used on public highways, streets, or other roads and may NOT be used for purposes other than off-road, legal racing/competitions uses.

EDGE PRODUCTS

Founded in 1999, Edge Products has become the premier name for aftermarket performance electronics. Edge produces modules and programmers for all major vehicle manufacturers, including Ford, Chevy, Dodge & Jeep. Edge endeavors to produce the highest quality products on the market and to deliver them with superior customer and technical support.

EVOLUTION Programmer

The Evolution re-tunes your truck to maximize performance, fuel economy and monitoring capabilities. And for diesel trucks, it is the first stand alone programmer to include an EGT probe. The Evolution comes with a custom-designed mounting pod to give it that "factory" look. It can also display up to four different parameters at a time to monitor vital engine data while you drive, perform 0-60 and quarter-mile performance tests and acts as a complete scan tool that reads and clears trouble codes.

BULLY DOG - #1 in Diesel Performance

Bully Dog offers products exclusively engineered solely for maximizing diesel performance. Bully Dog has demonstrated their market leadership by being the first company to develop propane injection for diesel applications, and was first to market with products for the Common Rail 24 valve Cummins and the 6.0 Liter Power stroke applications. Get the most power from your diesel with Bully Dog!

TRIPLE DOG™ Diesel & Gas Downloader

The Triple Dog™ downloader is the most powerful and versatile downloader available on the market.

These two downloaders will work on Dodge, Ford & GM light-duty pickups and includes industry exclusive features, are internet upgradeable and have the ability to transfer to a different vehicle. These downloaders also include the added safety, reliability and economy that you've come to expect from a Bully Dog downloader.

Performance Management Tool™ (PMT™)

An in-cab downloader, controller, monitor and gauge all in one.

The Performance Management Tool™ or PMT™ is the premier performance product available on the market today. This state-of-the-art unit performs as an in-cab downloader, controller, monitor and gauge packaged into one unit. The PMT™ offers on-the-fly adjustable horsepower programs and the most comprehensive list of vehicle monitoring options in the market. This product is internet upgradeable to accommodate more features and vehicle applications as they become available. The easy to use interface offers push button navigation or touchscreen navigation included with each unit. The color screen offers the best contrast and resolution of any screen in the automotive aftermarket. For a finished look while installed in the cab the PMT has multiple mounting options from an easy to assemble dash mount piece to fully custom plastic molded A-pillar and dash mounts made for vehicle specific applications.

Application	Part No.

TRIPLE DOG GT Gauge Tuner (Gas & Diesel)

The Triple Dog GT is an all in one downloader, monitor and tuning device.

The GT features multiple power settings with the ability to adjust drivetrain and user settings. In addition, the GT line features all of the same gauge/monitoring functions as well as the advanced Driving Coach software aiding drivers in maximizing their fuel economy. Triple Dog GT is the most versatile product on the market. It can be transferred from one vehicle to another and can be updated online free of charge as new features, vehicle applications and product updates.

TRIPLE DOG E3™ Diesel & Gas Downloader Gas Downloader

The Triple Dog E3 Gas downloader is designed to provide added performance and economy. Everything packed into this product, from the engine tuning to the speed limiter function is designed to help users achieve better fuel economy and usable performance gains. The Triple Dog E3 carries two engine tunes to accommodate regular gasoline powered pickups and SUVs and to accommodate flex fuel vehicles running E85.

- **Stock:** Choosing the Stock engine tune will result in no change to engine horsepower output. Other downloader features can still be used.
- **Economy:** This engine tune is recommended for use with 85 or 87 octane gasoline. This tune can be used for everyday driving and towing. Dynamometer testing results have shown a 10-12hp increase in rear wheel horsepower.
- **Flex Fuel:** This engine tune is recommended for use with E85. This tune should only be used on Flex Fuel approved vehicles running flex fuel.
- Speed Limiter
- Calibrate OEM Speedometer
- Diagnostic Trouble Codes

Diesel Downloader

The Triple Dog E3 Diesel downloader is designed to provide added performance and economy. Everything packed into this product, from the engine tuning to the speed limiter function is designed to help users achieve better fuel economy and usable performance gains. The Triple Dog E3 carries one engine tune to make things easy for the end user. That one engine tune is adjustable On-The-Fly, so the user can toggle back and forth between that tune and their stock power level, a matter of convenience.

- **Stock:** Choosing the Stock engine tune will result in no change to engine horsepower output. All other downloader features can still be accessed if the Stock engine tune is chosen.
- **Tow/Economy:** This tune can be used for everyday driving and towing. Dynamometer testing results have shown a 50 HP & 100+ lbs. ft. of torque increase in rear wheel horsepower.
- Speed Limiter
- Calibrate OEM Speedometer
- DPF burn-off/ Mobile Desoot
- Diagnostic Trouble Codes

DIABLOSPORT PREDATOR™ Handheld Flash Programmer

The Predator is a state-of-the art, high performance tuning flash programmer in a sleek handheld design. Once connected to the vehicle, the Predator's internal computer recognizes the vehicle's PCM and automatically picks the proper tuning files designed specifically for that PCM. Inside the Predator's memory are the actual tuning files that optimize spark timing and air/fuel ratio curves. Unlike other 'tuners', DiabloSport's programming is performed in very small increments throughout the entire RPM range, for a smoother, wider and a more predictable power delivery. DiabloSport engineers spend many hours on the dyno, street and track to ensure the tunes provided with the Predator are the best they can be.

Some Features of the Predator™:

- Dual timing adjustment points
- Timing table
- Dual fuel adjustment points
- Fuel table
- Idle Adjustments
- Raise Speed Limiter
- Rev Limiter
- Re-Calibrate Speedometer for Gear and Tire Size Changes
- WOT Shift Pressure
- RPM Shift Points
- Global Timing adder
- MAF curve adjustment
- Internet Updateable

Note: Not all programmers perform all of above functions. Please check catalog, website or Parts Pro store for specific programmer functions.

NEW!

PowerPuck installs in nine easy steps and in less than 10 minutes - no wires to cut, no seals broken and no feeding cable through the firewall!

DIABLOSPORT TRINITY™

The DiabloSport Trinity our all new performance programmer has the attributes you have been looking for in a revolutionary three in one heads up dashboard display. Trinity contains all of the great features you have come to expect from DiabloSport - a flash programmer, advanced diagnostics and a high resolution dashboard monitor combine performance, critical vehicle information and a clear understanding of what this information means.

Features:

- The TRINITY programmer tunes Ford & GM, gas or diesel vehicle applications.
- High Speed flash tuning, advanced diagnostics and monitoring from a gauge pod mounted compact device
- High resolution 320x240 back-lit color display for live data monitoring and viewing in all conditions.

Part No. T1000 Trinity Performance Programmer

Trinity™

Superchips

SUPERCIPS®

Superchips offers a complete line of hand-held tuners to cover most domestic cars and trucks. While we are famous for the incredible power gains (12% increase in HP on gas vehicles, up to 150 HP increase on diesels), our engineers and calibrators design the products for drivability. In addition, our customers rave about the fuel efficiency gains, even while picking up, on average, 50-60 extra HP.

Why FLASHPAQ Out Sells the Rest!

- Multiple performance enhancing calibrations including economy
- Adjustable vehicle speed limiter and engine rev limiter
- Compatible with Superchips Data Acquisition software package
- New model year support downloadable via superchips.com
- Internet updateable through supplied USB cable
- Greater increase in torque, power and drivability
- Improved shift points and firmness
- Supports wheel, tire and gear swaps
- Broad model year coverage included
- Retrieves, displays and clears Diagnostic Trouble Codes (DTC's) via the Diagnostic Library

MILEAGE XS

Economy & Power Have Never Been Easier Save at the Pump & More!

- Up to 10% MPG gains depending on vehicle, engine and driving conditions
- Calibrations engineered for improved fuel economy
- Retrieves, displays and clears Diagnostic Trouble Codes (DTC's) via the Diagnostic Library
- Coverage for many late model gasoline and diesel engines for pickups and SUVs
- Internet updateable through supplied USB cable
- Upgradeable to a full featured Flashpaq

SUPERCIPS®

Superchips offers a complete line of hand-held tuners to cover most domestic cars and trucks. While we are famous for the incredible power gains (12% increase in HP on gas vehicles, up to 150 HP increase on diesels), our engineers and calibrators design the products for drivability. In addition, our customers rave about the fuel efficiency gains, even while picking up, on average, 50-60 extra HP.

Superchips

CORTEX™

What CORTEX® Can Do For You!

- Provides up to three best-in-class performance levels including economy
- Allows tuning of multiple models across an OEM's line-up - OEMFLEX Tuning
- Includes an industry exclusive Two Year Limited Powertrain Warranty
- Features an industry first one part number per OEM
- Broad model year coverage included
- Retrieves, displays and clears Diagnostic Trouble Codes (DTC's) via the Diagnostic Library
- Logs performance times and speeds, and displays/stores PID data
- Supports wheel, tire and gear swaps

Flashpaq

Calibrates for Tires Sizes from 22"-42"

- Electronically adjust shifts patterns to improve drivability and corrects vehicle's speedometer to compensate for non-stock tires, wheels and rear-end gear swaps
- Retrieves, displays and clears Diagnostic Trouble Codes (DTC's) via the Diagnostic Library
- Internet updateable through supplied USB cable
- Upgradeable to a full featured Flashpaq

Some parts are not legal for sale or use in California on any pollution controlled motor vehicle.

HYPERTECH Programmers

Hypertech is a technology-driven company with a unique status in the aftermarket industry. Unlike other speed equipment manufacturers that produce hard parts like camshafts and cylinder heads, our core product is knowledge, the ability to tune the complex computers that control essential functions in modern vehicles.

MAX ENERGY™

Max Energy Tuning extracts every bit of energy possible out of every molecule of fuel giving you more miles at part-throttle and more power at wide-open throttle. In order to increase engine efficiency, HP and torque, our engineers first optimize the spark and fuel curves point by point over the entire rpm band. In addition, Hypertech's exclusive **Transmission/Converter Program** is in every power programmer to further increase fuel mileage by lowering automatic transmission shift points and locking the torque converter at lower speeds to average less **engine revs, intake strokes, friction and pumping losses and fuel wasting torque converter slippage**. With the additional power and optimized transmission functions, drivers use less fuel to accelerate and maintain cruising speeds without the torque converter un-locking and transmission down-shifting to a lower gear. The results are maximum power and fuel mileage.

The Most Powerful Tuning for Diesels That Tow

Three stages of Power Tuning are available with gains of up to 176 HP and 289 ft./lbs. of torque... plus fuel economy. Even the highest power level Stage 3, maintains safe EGts while towing the maximum weight specified by the vehicle manufacturer. We develop all of our Power Tuning under real-world conditions of maximum load and steep grades, but with safe exhaust gas temperatures.

SPEEDOMETER CALIBRATOR

If you're running non-stock tires, our Speedometer Calibrator can correct the speedometer and odometer for tires up to 54 inches (for most applications). This device is engineered for the speedometer recalibration functions of the Max Energy Programmer, but without the additional expense of the other tuning features. The Speedometer Calibrator also comes with a USB cable and a CD containing software to enable quick updates and upgrades over the internet. How does it work? Simply plug the Speedometer Calibrator programmer into the vehicle's under-dash-connector, select the tire height and new gear ratio, and in a matter of minutes, your vehicle's computer is reprogrammed for accurate speedometer and odometer readings (as required by law). In addition, the Speedometer Calibrator reads and clears Diagnostic Trouble Codes (DTCs) or "check engine" lights. This allows you to view detailed information about your vehicle's operation without having to purchase expensive diagnostic computers or scanners used by dealership technicians.

POWER TUNING - What Is It?

Power Tuning is a procedure that Hypertech invented and developed to improve the performance and efficiency of computer-controlled vehicles. An internal combustion engine needs air, fuel, and spark the familiar "Combustion Triangle". Hypertech Power Tuning optimizes these three elements to produce maximum performance. An engine's power output is directly proportional to the amount of air and fuel that it can burn. Hypertech Power Tuning maximizes engine performance by burning the air/fuel mixture as efficiently as possible, thereby extracting maximum power. Power Tuning replaces the stock calibrations in the onboard computers used in late-model cars and trucks. These complex programs control important engine functions such as spark timing and fuel delivery. The only way to modify fuel delivery and spark timing to increase power is to optimize the tuning information supplied to the computer.

HYPERTECH Programmers

Hypertech is a technology-driven company with a unique status in the aftermarket industry. Unlike other speed equipment manufacturers that produce hard parts like camshafts and cylinder heads, our core product is knowledge, the ability to tune the complex computers that control essential functions in modern vehicles.

Max Energy™ E-CON™

The E-CON Economy Power Programmer is designed for the driver who needs better fuel mileage and more power, but doesn't want to pay for other high performance features they do not need.

Easy Plug-and-Go Installation

Simply plug the E-CON into your vehicle's under-dash connector, choose your tuning program, then with the push of a button re-program your vehicle's computer with improved power and efficiency.

Gas Vehicles

The E-CON offers "Regular Octane" tuning for gas vehicles. This program will deliver excellent power gains for cars and trucks that are factory capable of using regular octane. Note: E-CON is NOT recommended for vehicles using premium octane.

E-85/Flex-Fuel Vehicles

The E-CON's "Regular Octane" tuning can be used with E-85 fuel on vehicles that are E-85 capable. The improved engine tuning will increase the part-throttle efficiency and wide-open throttle performance compared to the factory tuning.

Diesel Vehicles

The E-CON offers "Fuel Tuning A or B" for diesels. These two programs allow the driver to choose the program that suits their driving needs and delivers the best fuel mileage for the application and circumstance

JET Performance Products

JET Performance Products is a leader in tuning technology. Constant changes in computer technology of today's cars and trucks demand that JET's engineering staff be the best. They are dedicated to providing the customer with the best tuning possible.

PERFORMANCE MODULES for Dodge/JEEP

The Jet Module for Dodge/Jeep applications is a JET exclusive. Using technology similar to our PCM, the JET module for Dodge trucks and Jeeps provides the ultimate in power tuning. Point by point air/fuel, ignition advance, transmission and various other tuning points provide performance gains of up to 25 hp.

05-08 Mustang GT	4.6L	70502
07-08 Shelby GT 500 (Manual)	5.4L	70510

POWR-FLO MASS AIR SENSOR

JET Performance Products now offers mass airflow sensors. These mass airflow sensors flow 41% more airflow than stock. The Powr-Flo sensor is designed to improve horsepower and increase gas mileage. Simple installation with full tech support backed by JET Performance. They are compatible with factory electronics, stock vehicles, as well as modified vehicles including but not limited to: performance tuning (chips, modules, etc.), exhaust modifications (catback, headers, etc.), cold air intakes and ignition systems.

NEW!

V-FORCE PLUS

The all NEW JET V-Force Plus are designed for the enthusiast that wants improved performance, acceleration

and the ability to monitor vehicle information. Designed to optimize ignition advance and fuel maps. In addition, the software in the program allows the user to select from 14 different screens to monitor throttle position, mass air flow, manifold pressure, fuel economy and air/fuel ratio. This allows the driver to monitor on the backlit LCD, driving habits for the best fuel economy and performance.

FEATURES:

- Improve horsepower and throttle response
- Optimized ignition advance curves
- Extensive recalibration of fuel maps
- 14 different monitoring screens
- Ability to add oxygen sensor hook up for additional monitoring
- Multiple ways to mount LCD

Applications available for many Domestic and Import Cars & Trucks including:

- Acura
- Buick
- Chevrolet
- Chrysler
- Dodge
- Ford/Mercury
- Honda
- Infiniti
- Mazda
- Mitsubishi
- Nissan
- Oldsmobile
- Pontiac
- Scion
- Toyota

PERFORMANCE PROGRAMMERS

The JET Performance Programmer provides immediate horsepower and torque increases throughout the entire RPM range. The easy to use interface provides quick installation and offers three levels of tuning for all octane ratings and for any driving situation.

- Tuning for regular, mid-grade and premium octane fuels
- Increase horsepower and torque
- User friendly installation
- Modify top speed limiter
- Modify shift points
- Calibrate speedometer
- Read and clear codes
