

# NEW PRODUCTS for 2009!

**Edelbrock E-Force Supercharger**  
It's the talk of the performance media outlets; tons of power, Edelbrock cool, and a great value as well.

## Auto Meter American Muscle

Auto Meter quality with the looks of yesteryear. Cool. Need we say more?

## PAINLESS™

### Painless Striker ColdShot II

More drivers are learning that water/methanol injection works. Painless Performance's new universal gas/diesel system is complete yet more affordable than ever. Want more power? Try alcohol and water!

Professional  
Products®

**AWARD  
WINNING!**

## Professional Products Powerjection III

Professional Products continues to innovate throttle body fuel injection systems, making them less expensive and easier to install and operate. The Powerjection III carries the Engine Management System on the side of the unit, eliminating much of the wiring hassle and bulk.

## MSD Programmable 6AL-2 Ignition

MSD allows you to take full advantage of digital ignition with the programmable 6AL-2. This ignition gives you the flexibility to tune an ignition curve or boost the timing map from a PC.

**MSD  
IGNITION**

## GM Performance Slant Edge Valve Covers

The look states power and style. GM Performance has a winner in this small block cover. Available in 10 configurations so you can have the latest look, but still be different from the pack.

## Superchips Flashpaq

America's best selling programmer has been updated. More coverage including Jeep and Nissan, plus a new smaller form for easier dash storage.

## XS Power Lithium Powerpack Batteries

How light can you go? Thanks to Lithium technology, XS Power now offers batteries for alternator equipped cars as light as 4lbs!

## Flaming River Mustang II Power Rack

The Mustang II rack designed for the street rodder. Shipped complete with the pump and pulley, calibrated to work as a matched set. 100% new for trouble free performance.

## Pertronix Ignitor III

Pertronix takes the conversion of points type distributors to a new performance level. Producing five times more spark energy, Ignitor III is like getting ignition box performance without buying the box.

# NEW PRODUCTS for 2009!

## MAGNAFLOW<sup>®</sup> Performance EXHAUST

### Magnaflow Exhaust

The '09 Challenger is hot and Magnaflow rushes to market with exhaust systems to eliminate factory exhaust restrictions. Magnaflow offers cat-back or axle-back systems for your R/T Hemi. Go ahead, set the horses free!

### Edge Racing

Diesel engines can create monstrous power and torque. Edge Racing now offers 7 levels of off-road only programming for those wishing to race or off-road their diesel powerplant at maximum output levels.

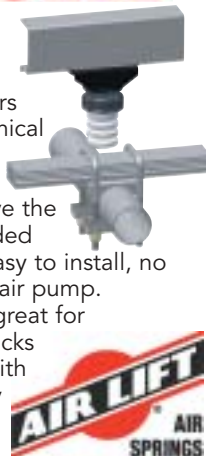

### Hurst Shifters

The Challenger is here, the 2010 Camaro's coming, and Hurst is ready. Hurst offers shifters for today's muscle cars, delivering shorter throws, smooth performance, and the look that can only be Hurst.

## AirCELL<sup>™</sup>

### Air Lift AirCell

Air Lift offers the economical way to reduce sag and improve the ride of loaded vehicles. Easy to install, no air lines or air pump. Especially great for working trucks that deal with loads every day.

## Edelbrock

### Edelbrock LS1 Universal Conversion Headers

The LS series engine is hot and Edelbrock just made it easier to put that block in your street rod. Very compact to give you more options for vehicle installations.

## New Vendors for 2009

### Powerbond

PowerBond's unique construction creates balancers that are far more reliable than OE or conventional designs. Plus Powerbond builds underdrive versions for modern engines like the LS series that allow you to rev the engine and free up horsepower! *See page 105*

### QA1

QA1 has become the source for performance shocks for circle track, drag race, and street performance applications. Their coil-over shock systems provide more flexibility in suspension set up while reducing weight and improving control. *See pages 198 and 199*

### Remflex

Bring your tough exhaust sealing problems to Remflex. Uneven flanges, warping, rough surfaces? Remflex seals where others do not through the use of a modern material that will crush by almost 50%. This crush means better sealing, longer lasting sealing, and quiet, secure headers. *See page 116*

### Proform Scales

Racers have long known the benefits of weight distribution in vehicle handling and performance. Proform now makes accurate vehicle scales affordable to virtually any race team.

### Auto Meter ECO

Imagine having a tool that can teach you to drive more economically. The Eco from Auto Meter does just that as a ring of leds around the gauge perimeter inform you when your driving is normal, fuel hogging, or fuel saving. Drive, watch, and save.
